---

Gary – Regarding your inquiry about using our proposed security cameras and system for a real-time web cam, that is not going to work because of the power limitations to the system. Recall, the system is going to be solar-powered, and the potential for draining our power supply by web-cam usage is too great.

We should have a work plan/OMM amendment for the security system and for proposed buoy enhancements to you on Tuesday 2/16 or before, so you can present those in your meetings next Wednesday. IP and MIMC are also committed to developing proposed enhancements to the armored cap to prevent potential damages from vessel strikes in parallel with the USACE assessment. Finally, I am actively working with Benchmark Ecological on a plan to complete the dive inspection that your folks started. One question pertaining to that, is how do you want to coordinate EPA oversight/participation in that dive inspection? Our intent would be to complete it as soon as we get approval from you. I will likely get you a proposed work plan next week.

Let me know your thoughts on these issues when you can.

Thanks,  
David
